Carmen,

I am unaware of any bullets we are working on for Dupont. We did work with Diane on the statement below>

EPA was notified by the National Response Center on Saturday, November 15, 2014 that the DuPont Laporte facility reported a release of Methyl Mercaptan from its facility. Emergency responders are on-scene including the Channel Industries Mutual Aid, Texas Commission on Environmental Quality, county officials and EPA. Air monitoring is being conducted and initial results have not shown elevated levels of the chemical beyond the facility.

Thanks,
Ronnie
